Our clinic is a multiple disciplinary clinic, psychologist, nutritionist, nurse case manager, social worker. We provide support and guidance thru the feeding stages from newborn (including premature infants) through six years of age. By a combination of nutrition and development assessment, including feeding observation in clinic, at home, and in school as needed. We also provide community resources information in the face of decelerating weight gain, poor growth over a period of time.

Criteria for referral:

___ Age: birth through age 6
___ weight at or below 10%ile
___ weight for height or BMI at or below 10%ile
